

TELEGRAPH.
Office 120 Main Street.
ASHTABULA, OHIO
Friday Morning, Nov. 26, 1880.

The death of Gov. Williams of Indiana announced and, Lt. Gov. Gray, was on his way to the capital.

A. Mosheim, the Ute Commissioner, been arrested by the authorities of Colorado as accessory to the murder of Jackson, the freighter.

Nash thinks that there is no longer any yooze in killing niggers to keep them from the poles in the South, for the North kin elect without us, and its wasted powder and shot.

The Republican press of this state gives forth no uncertain sound for John Sherman as the successor of himself in the Secretaryship, or the successor of Senator Thurman.

The President elect declines the honor of a reception at Washington. He goes as a private citizen, on private business, and would prefer no demonstration. It is therefore given up.

The Hon. Alexander Stevens is reported to have said that he would vote for paying the U. S. Superintendents and Deputy Marshals, as they are entitled, for having done their duty according to law.

It is asserted the President Elect pertinaciously refuses to be interviewed, and any intimation of political or official matters fails to meet a cordial response. The General himself says he has become a very respectful listener.

Congressman, Senator elect and President elect Garfield. What man has ever been more honored by the people? He must resign two honorable positions in order to accept the one to which he has just been elected, and which he did not seek.

The logic of Judge Davis decides that the Chinese letter forgery implies that every member of the Democratic National Committee, known to have been engaged in the publication of the Philip letter, is open to prosecution for malicious libel, with Messrs. Hewitt and Barnum at their head.

A Telegram has reached the State Department announcing that a treaty on the subject of immigration has been concluded between the U. S. States commissioners and the Government of China. The department declines at present to furnish any particulars, but asserts that it is satisfactory.

While the Democratic National Committee has campaign bills of \$25,000 to meet with no one to respond to them. Secretary Sherman's friends were a little lax at the Grand Hotel, Chicago, for the accommodation of the Secretary's supporters. A little bill of \$3,800, was met by Gov. Foster out of his private purse, to save the name of the State.

At a meeting of the Republican Committee of the XIX Congressional District at Warren, on Thursday last week, Hon. E. B. Taylor was unanimously nominated as the candidate to fill the vacancy in Congress occasioned by the resignation of General Garfield. Sheriff Stiles has issued his proclamation for a special election to be held on Tuesday, Nov. 30th.

All the candidates for Congress to represent the 19th District—have agreed to stand aside in deference to Judge Taylor, who has been elected for the full term, and therefore has a claim for the unfinished term of Gen. Garfield. This fraction, for which an election will be held on the 30th, expires on the 4th of March. Our Republican friends should not come to the conclusion that the importance of this election is in the ratio of its brevity, and therefore neglect to attend the polls, and thus let some bourbon Democrat occupy the seat.

No tidings of the safety of the three-masted brago, Morning Star, with all on board. The star was in tow of the Sprague, which left Toledo last Wednesday morning a week. When off Port Stanley, north shore, the tow line parted and the Sprague succeeded in making her way to Long Point and afterward to Buffalo. When the storm abated nothing could be found of the Star. She was loaded with 40,000 bushels of wheat for Buffalo, valued at \$20,000, and was insured for \$17,000. The vessel is believed to have gone down in deep water.

The proposition, in New York, to raise a pension fund for ex-Presidents does not meet with special favor by the public at large. It is very natural and proper that it should be so. Why pension an ex-officer of the government after paying him a salary of \$50,000 with various perquisites thrown in? The idea is preposterous. A pension—a gratuity to a party after the conditions of an agreement have been complied with. Who with the dignity of character for the executive of this great nation would care to be dwarfed by being made the beneficiary of a pension? Ex-President Grant's idea is the true one. He has no claim upon the people. The government has discharged the full measure of its obligation, and let new obligations follow new demands for service.

SOUTH CAROLINA CENSUS. Notwithstanding General Walker's confidence that the enumeration of the inhabitants of South Carolina has been correctly returned, such representations of existing dissatisfaction have been made to President Hayes that at his direction a new commission will proceed to enumerate certain portions of that State. For this purpose Colonel Butterfield, lately supervisor of census in Vermont, has started with four assistants for South Carolina, to make a recount in certain districts where the greatest frauds are alleged to have been committed. This is done to satisfy all parties. President Hayes as well as General Walker being convinced of the correctness of the recent enumeration, but both desiring the report above suspicion when

THANKSGIVING.—This anniversary is one that fills the heart with pleasant associations. It is indeed the holiday of the heart and hearthstone, and from a local New England anniversary it has come to be the favorite festival of the nation, as well as the State. The President of the United States conjointly with the governors of the commonwealth makes proclamation to the people for a reverent and joyous observance of the annual festival of the nation. Dedicated as it is by Christian rulers, to public gratitude and praise, it needs no official proclamation to give it a hallowing and mellowing influence with the people—to make it the well-remembered day of kindred hearts and loved ones, to surround it with associations the most sacred to the household and household memories. During the past year not only has the good Father blessed us most abundantly "in our basket and our store" in bountiful harvests and reviving industries throughout the land, but there has been a far more beneficent awakening of patriotic love for the Republic so signally led along and preserved as the glorious heritage of ourselves and our children. Such an inheritance—preserved through a waste of blood and treasure, of bitter strifes and conflicts—cannot but be transmitted to generations to come after us. When on this day the family, long separated, reassembles about the festive board and the vacant chair reminds us of one and another that went down in terrible conflict, and sleep perhaps in a nameless grave, instead of comfortless grief let us rather rejoice that by reason of noble sacrifices the nation lives—Liberty and Justice survive.

OUR NEW YORK LETTER

On Monday last the Farming and Manufacturing Association had a meeting in Science Hall. Addresses, setting forth the object of the society, were made by Mr. Sharp, president of the association, and Dr. Theiss. It is proposed to found a colony in southwestern Missouri, where 600 acres have been selected. It is to be called "Eglinton," in honor of its first settler. The land is well timbered, and contains plenty of water and a lead and zinc mine. The payment of \$100 entitles a member to a home and supplies until he can support himself. If he is married no extra payment is necessary unless he has a large family. The colony will be governed by a president and a council, to which every member may appeal. The president and council are elected permanently, but can be removed by a vote of 100 or more members. Good character is a requisite for membership, and no others will be tolerated.

The society is organized to carry on the business of agriculture and manufacturing, and the members are expected to produce and make everything needed for their personal comfort. Every member will be required to labor eight hours a day, the payment of which will be in bonds called labor notes. These notes will be received as money by the association; hence it is desired that the members shall be workmen. No discrimination in favor of women will be made. Everyone will enjoy the same rights and will be entitled to a voice in the government. The same wages will be paid to women and men for equally good work. As more luxuries and comforts are obtained, the money will be raised. When the association becomes self-supporting this money will be placed to the credit of each member, with accrued interest at 7 per cent.

By the more detailed census returns given this week, it appears that 478,000 persons born in foreign countries are residents of this city, while 738,000 of the inhabitants are natives. Two-fifths of our people are, therefore, foreigners by birth. It should be remembered, in considering these proportions, that we have a very large foreign population that does not vote—made up of agents, partners and clerks who merely represent here foreign business houses.

There are no less than fourteen men and two women in the Tombs Prison awaiting trial for the crime of murder. These offenses were all committed since last May, a period of only six months, and they embrace every possible method of inflicting death. With so large a number of accused murderers in prison, the reflection is forced upon one's mind, that the justice system is a little more quickly than might prevent many a crime yet to be recorded.

The "Ladies Blushing Bonnet" is a new Persian device. To the sides of the head are under the chin are attached two tiny, but powerful, steel springs ending in round pads, which are brought to bear upon the temporal arteries by the action of lowering the head, and by artificially forcing blood into the face, and causing them to be suffused with crimson at a moment's notice.

The Cathedral of the Incarnation at Garden City, Long Island, the magnificent charity of Mrs. A. T. Stewart, in which is the family mausoleum, is to have the greatest musical instrument in the world. Ordinarily it is spoken of as an organ, but in reality it is a combination of instruments, and the work of placing them in position is far advanced. This organ is the largest one in the world, the total number of speaking stops being 115 and the number of pipes 7631. The organ in Royal Albert Hall, London, has 111 stops; the Cincinnati organ 96, and the Boston Music Hall organ 84. The Garden City Cathedral has four manual keyboards and one pedal keyboard, and although it is all played from one keyboard, situated at one side of the choir, it is distributed in four parts of the Cathedral—one in a chamber on one side of the chancel, another in the tower at the opposite end of the church. The third part is in the chancel, and a fourth is above the ceiling. It is called the echo. All of these organs may be operated together or separately at the pleasure of the organist. The belows are operated by 6 hydraulic engines, under the immediate control of the organist. One of the engines operates a magnetic machine which generates the electricity for operating the remote portions of the organ which are connected with the chancel by over twenty miles of insulated wire. The total cost of the organ will be over \$50,000, and every effort is being made to have the instrument as perfect as human skill can make it.

THANKSGIVING PROCLAMATION

STATE OF OHIO, EXECUTIVE DEPARTMENT.

By the favor of Almighty God our people have emerged from the darkness of national and industrial stagnation and discouragement into the sunshine of unprecedented activity, prosperity, and happiness.

Within the bounds of our State no industry is languishing and in every department of human effort a strong and vigorous pulse denotes a healthful circulation through all of the arteries of trade and commerce.

The same kind Providence has filled the measure of blessings to our vast agricultural interests, and has restored plenty, quiet and contentment among the myriads of laborers in our mines and manufacturing.

Because of these things; because of the added proofs of the wisdom and perpetuity of our system of Government, founded upon the principles of equality, liberty and justice; because the Creator has strengthened by new evidences of His favor and goodness our faith in the enduring strength and greatness of our Nation; because in every heart is implanted an impulse of good.

Therefore I recommend that Thursday, the 24th day of November, 1880, be set apart and dedicated to the duty and pleasure of thanking God for His mercy and kindness to this people.

Glenn under my hand and the great seal of the State of Ohio, at Columbus, 10th day of November, in the year of our Lord one thousand eight hundred and eighty, and in the one hundred and fifth year of the independence of the United States of America. CHARLES FOSTER.

By the Governor, MILTON BARNES, Secretary of State.

One of the most promising results of the election in the excellent spirit shown in the main by the Southern press. They frankly declare their disgust with the management of the Democratic party and their distrust of its ability to aid them in securing any of the political results for which they are striving; and indications are not wanting that a large mass of the Southern Democracy are thoroughly alienated from their allies in the North. The Charleston News, one of the most influential of the Southern papers, declares that if the Southern people can only be sure that "the National Government will not furnish means for squeezing the south dry, as South Carolina was squeezed from 1868 to 1876. The solid south will become a thing of the past, and the Southern people will divide on agricultural and commercial questions; and it adds that New England is nearer to the South Atlantic states in matters relating to finance and tariff than Mississippi and Texas are.

One of the first questions, it concludes, that the Southern states will have to ask themselves is, whether the welfare of the south has been and is likely to be hindered or advanced by alliances with the Democrats of the North? and they will make themselves heard on this question before the winter is past. The Memphis Avalanche declares that the result of the election with the dissolution of the two solid sections that are now arrayed against each other.

THE ANTHEM HARP.

FOR CHORUS AND QUARTET CHOIRS. BY W. O. PERKINS, MUS. DOCT. PUBLISHED BY O. DITSON & CO.

The Anthem Harp is a book of ordinary church music booklets, and seems to contain an excellent variety of "Opening Pieces," or Anthems, for the use common choirs. It is designed to be a successor to "Perkins Anthems," by the same author. As the former book was very popular, we may confidently predict good success for a new one on the same plan.

The Anthem Harp has 248 pages, and in the neighborhood of a hundred pieces. Not far from a quarter of these are Anthems of some length for special occasions, and has about an equal number of "three page Anthems," "two page Anthems," and of short sentences, Motets and Chants, which answer a good purpose when the time is brief.

One is pleased to see old "Jerusalem" revived from its long sleep, and provided with first-rate new music. "Savior, breathe an evening blessing," and a few choice hymns, are preserved, but most of the words, as they always must be, are from the Scriptures.

The cargo of coal on board the screw Tessa, sunk at the Harbor in the course of unloading by the aid of a diver.

The organ in Royal Albert Hall, London, has 111 stops; the Cincinnati organ 96, and the Boston Music Hall organ 84. The Garden City Cathedral has four manual keyboards and one pedal keyboard, and although it is all played from one keyboard, situated at one side of the choir, it is distributed in four parts of the Cathedral—one in a chamber on one side of the chancel, another in the tower at the opposite end of the church. The third part is in the chancel, and a fourth is above the ceiling. It is called the echo. All of these organs may be operated together or separately at the pleasure of the organist. The belows are operated by 6 hydraulic engines, under the immediate control of the organist. One of the engines operates a magnetic machine which generates the electricity for operating the remote portions of the organ which are connected with the chancel by over twenty miles of insulated wire. The total cost of the organ will be over \$50,000, and every effort is being made to have the instrument as perfect as human skill can make it.

THANKSGIVING PROCLAMATION

STATE OF OHIO, EXECUTIVE DEPARTMENT.

By the favor of Almighty God our people have emerged from the darkness of national and industrial stagnation and discouragement into the sunshine of unprecedented activity, prosperity, and happiness.

Within the bounds of our State no industry is languishing and in every department of human effort a strong and vigorous pulse denotes a healthful circulation through all of the arteries of trade and commerce.

The same kind Providence has filled the measure of blessings to our vast agricultural interests, and has restored plenty, quiet and contentment among the myriads of laborers in our mines and manufacturing.

Because of these things; because of the added proofs of the wisdom and perpetuity of our system of Government, founded upon the principles of equality, liberty and justice; because the Creator has strengthened by new evidences of His favor and goodness our faith in the enduring strength and greatness of our Nation; because in every heart is implanted an impulse of good.

Therefore I recommend that Thursday, the 24th day of November, 1880, be set apart and dedicated to the duty and pleasure of thanking God for His mercy and kindness to this people.

Glenn under my hand and the great seal of the State of Ohio, at Columbus, 10th day of November, in the year of our Lord one thousand eight hundred and eighty, and in the one hundred and fifth year of the independence of the United States of America. CHARLES FOSTER.

By the Governor, MILTON BARNES, Secretary of State.

One of the most promising results of the election in the excellent spirit shown in the main by the Southern press. They frankly declare their disgust with the management of the Democratic party and their distrust of its ability to aid them in securing any of the political results for which they are striving; and indications are not wanting that a large mass of the Southern Democracy are thoroughly alienated from their allies in the North. The Charleston News, one of the most influential of the Southern papers, declares that if the Southern people can only be sure that "the National Government will not furnish means for squeezing the south dry, as South Carolina was squeezed from 1868 to 1876. The solid south will become a thing of the past, and the Southern people will divide on agricultural and commercial questions; and it adds that New England is nearer to the South Atlantic states in matters relating to finance and tariff than Mississippi and Texas are.

One of the first questions, it concludes, that the Southern states will have to ask themselves is, whether the welfare of the south has been and is likely to be hindered or advanced by alliances with the Democrats of the North? and they will make themselves heard on this question before the winter is past. The Memphis Avalanche declares that the result of the election with the dissolution of the two solid sections that are now arrayed against each other.

THE ANTHEM HARP.

FOR CHORUS AND QUARTET CHOIRS. BY W. O. PERKINS, MUS. DOCT. PUBLISHED BY O. DITSON & CO.

The Anthem Harp is a book of ordinary church music booklets, and seems to contain an excellent variety of "Opening Pieces," or Anthems, for the use common choirs. It is designed to be a successor to "Perkins Anthems," by the same author. As the former book was very popular, we may confidently predict good success for a new one on the same plan.

The Anthem Harp has 248 pages, and in the neighborhood of a hundred pieces. Not far from a quarter of these are Anthems of some length for special occasions, and has about an equal number of "three page Anthems," "two page Anthems," and of short sentences, Motets and Chants, which answer a good purpose when the time is
